Advantage of Melamine

NSF Certification link: http://www.nsf.org/
National Sanitation Foundation
Melamine is a kind of synthetic resin,can be hardened and shaped afer heating with good heat resistance
Melamine is one of a wide range of plastic materials.
Non-toxic and tasteless,light weight,impact resistancs,not easy to deform,low thermal conductivity,not easy to break.
JB company's products have passed SGS food safety certification,NSF National Public Health Certification, please feel free to use.

NSF International
RECOGNIZES
JB PRODUCTS FACTORY LIMITED
Facility: ZHONGSHAN, GUANGDONG, CHINA
AS COMPLYING WITH NSF/ANSI 2 AND ALL APPLICABLE REQUIREMENTS.
PRODUCTS APPEARING IN THE NSF OFFICIAL LISTING ARE
AUTHORIZED TO BEAR THE NSF MARK.
December 2, 2008
Certificate# C0006201 - 01

The Leading Supplier of Comprehensive Foodservice Solutions for F&B Operations

【30 Years Specialized in Manufacturing PC Clear Foodservice Ware】

JB Products Factory Limited was founded in 1996.

JB Products keeps exploring material innovation by utilizing advanced new materials including PC, PP, PMMA and melamine.

We have successfully rolled out a full lineup of premium goods covering kitchen, front-of-house, hotel guestroom, floral vase, aquatic and storage applications.

We operate a portfolio of well-known brands under its umbrella, including JB Products (covering PC and melamine series), MLV, Starwares, and XYZ.

Our marketing network spans mainland China, the United States, Japan and numerous other countries and regions globally.

JB Products fully considers market demands and social concerns. We carry out product R&D and manufacturing with safety as our top priority.

We have set up a comprehensive quality assurance system and obtained a host of authoritative domestic and international certifications.

By exercising full control over every link spanning R&D, manufacturing and sales, JB Products has grown into one of the most distinguished manufacturers domestically and globally.
We keep delivering all-around, premium products and services for foodservice and household use.

Moving forward, JB Products will steadily boost its core competitiveness to solidify and elevate our leading position within the industry. We will vigorously expand domestic and international markets, keep developing premium products to meet market demand, create development opportunities for employees, deliver returns to shareholders, and shoulder our social responsibilities.

Contents

Scene Application Series 1-16

Disk-Shaped 17-50

Bowls 50-70

Grid Tray & Tea Tray 71-75

Soup Bowl & Dessert Set 76-79

Seasoning Dish 80-86

Ashtray & Cup & Spoon 87-93

Sanded Black Series 93-111

Cherry Blossom Black &
Green Crack Pattern &
Bamboo Weaving Collection 111-117

New Product Series 118-128

Buffet Series 129-138

Using Method:

- Do NOT use in microwave or oven.
- Do not expose to direct open flame or place near fire sources.
- Do not pour hot oil or chemicals onto the product.
- Not suitable for use on food warmers.
- While shatter-resistant, heavy impact may still cause damage.
- Safe for dishwasher and sanitizer cabinet; recommended max temperature: approx. 80°C.

Washing Method:

- Do not use steel-wire brushes to prevent surface scratches. Clean with sponge/soft cloth, neutral detergent & water.
- Avoid chlorine-based bleach; may result in material deterioration and discoloration.
- Boiling disinfection: maximum 10 minutes.
- Dishwasher-safe.
- For old tableware with stubborn stains, soak in hot water with dedicated melamine stain-remover powder.

IRON BRACKET

APPLICATION SCOPE:

It is very suitable for storing food;
Used in food preparation;
Used in the display of buffet food;
Used for the delivery of food to the meeting.

CHARACTERISTIC:

Production with imported new raw materials;
American Standard Design;
Low heat conduction, not easy to be damaged, easy to stack and deliver;
It is equipped with rich combination accessories, which makes the display more flexible and free;
The perfect combination of melamine and PC material makes it more unique and can be used freely
Match.

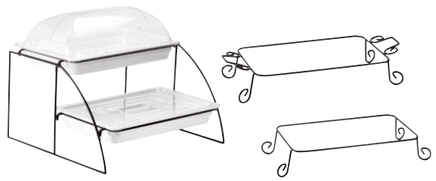

Detachable combination

Can be matched with Jiabao series meal cover

Supporting wire rack

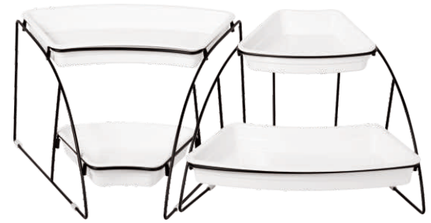

DISPLAY PANEL

Half arc shape, large space, round halo, easy to clean
Abandon triviality and enjoy simple life.

One shelf, two assemblies

MELAMINE TABLEWARE SAFETY

A product loved all over the world for many years

Born in 1938, meinai cutlery, owns With a history of more than 70 years, it has always been one of the world's favorite materials, and its safety has been recognized by health professional organizations around the world. Its appearance is like ceramic, resistant to falling, not easy to break, beautiful and easy to clean. It is often used in daily necessities, children's tableware, dress ware, widely used in families, schools, restaurants and department stores. It is a safe and convenient tableware.

The safety of medinwarelt is recognized as a safe product all over the world

Recently, more and more people are using melamine tableware. Some consumers or new media think that it will release formaldehyde and melamine, causing safety concerns. In Japan, the United States, Europe and other countries, there are set limit values and safety tests for formaldehyde and melamine, which prove that the safety of melamine is safe. Health specialized agencies in many countries guarantee the safety of melamine.

Even after a whileSecurity remains undiminished

Even if the surface is slightly damaged after long-term use, the test results will not dissolve melamine and formaldehyde as the new product, so the safety is still no problem and can be used at ease. However, whether it is metaneware or tableware made of other materials, it still has a useful life. It is necessary to replace tableware according to the way of use, cleaning and storage.

Strict testing standards and tolerable daily intake in various countries

Europe, America, Japan and other countries in the world have set hygiene standards for American tableware, and carry out food hygiene and safety monitoring according to this standard. In addition, according to the expert meeting of the food and agriculture organization of the world health organization, melamine is currently classified as Group3, which means that it is not carcinogenic to human beings, and its tolerable daily intake (TDI) is set at 0.2mg/kg bw/day. The U.S. FDA sets the standard at 0.063mg/kg BW /day.

Strict testing standards and tolerable daily intake in various countries

The national standard for testing melamine is to place the melamine dissolving value within 2.5 PPM after 30 minutes at 95℃ at 4% acetic acid. This is more stringent than the actual conditions of use, and under such standards, There is still no formaldehyde and melamine found in Gabor's plate products, so it is more unlikely to dissolve toxic substances in ordinary use.

Note 2: MTT materials are afraid of acid and heat, which is a very strict test for MTT. If prolonged or repeated testing, even the poor quality of the test products will occur corrosion cavity phenomenon.

Formaldehyde is ubiquitous in our life

Actually also contains formaldehyde in foods in our daily life, daily in the natural food to eat fish, vegetables, fruits, meat, grains, and than using melamine tableware may also release several times, Japan's national health laboratory report points out that formaldehyde contained the highest apple has 17 PPM 15 PPM, tomatoes, eggs have 5 PPM, Even milk contains 1.7 PPM, and formaldehyde is easily dissolved in water, oxidized into formic acid and discharged out of the body, so it does not accumulate in the body and has no impact on health.

The ingredients are also important

Garbomei plate products are made of advanced 5A raw materials -100% American plate resin (scientific name: formaldehyde melamine resin), his characteristics are very obvious, non-toxic and tasteless, and light heat preservation, with ceramic luster, but more than ceramic collision resistance, not easy to break, and beautiful appearance, temperature range between -20℃ to 120℃. The products have successively passed the national QS quality certification, and obtained NSF American health and safety certification and EU SGS food health and safety certification.

Melamine is excreted from the body by water

Some scholars research, points out that the consumption of toxic melamine tableware costumes hot soup, in the urine concentrations of melamine in 12 hours have obvious rise, but most of the industrial chemical melamine in 24 to 48 hours can follow the metabolic way of urine eduction body outside, at present in view of the long-term use of melamine tableware human health risk more research remains to be proved. Gao's team calculated that a bowl of noodle soup containing 700 milliliters of melamine, if the amount of melamine dissolved in a bowl of noodle soup is 0.75 mg, 60 kg adults only eat this bowl a day, the daily intake per kg per person is 0.0125 mg, it would take five bowls of noodle soup to exceed the recommended daily intake in the United States (0.063 mg). If the level of melamine and similar compounds in products can be controlled under 2.5mg/kg, there is no need for consumers to panic and fear this small dose. In addition, Before purchasing Memenet tableware, it should be confirmed that there is a clear and complete label, the heat resisting temperature of the tableware and whether the raw materials are A5 memenet material, to avoid brightly colored memenet tableware with exciting odor, so as to reduce the risk of dissolving toxic substances from memenet tableware and provide consumers with a "safe eating" dining environment.

MELAMINE

FORMALDEHYDE&MELAMINE

Comparison table of various cutlery materials

	Melamine	Stainless steel	Porcelain	Wood
Material				
Degree of heat	-30 ℃ ~120 ℃	Heat resistance to 1000℃	-20 ℃ ~400 ℃	0 ℃ ~80℃
Thermal conductivity	Low thermal conductivity	High thermal conductivity	High thermal conductivity	Low thermal conductivity
Microwave use	Do not use microwave	Do not use microwave	Microwave serviceable	Do not use microwave
Product advantages	Non-toxic and tasteless, and light heat preservation, ceramic luster, but more than ceramic collision resistance, not easy to break, and beautiful appearance.	Strong corrosion resistance, easy processing, bright appearance and health, easy to clean, high temperature is not easy to deformation, collision resistance is not broken.	The appearance is bright and sanitary, easy to clean, the shape is elegant and delicate, can be used in microwave oven, dishwasher and oven.	When using, it will not hurt the surface and will not produce scratches. Compared with metal, it will not affect the taste of food. The touch surface has a good texture.
Product defect	It is easy to dissolve melamine after surface damage	Heavy metal - manganese	Contains heavy metals - lead, chromium	Paint contains lead or cadmium
Health hazard	Ingesting too much melamine can cause kidney stones or kidney failure. Drinking more water can promote kidney detoxification function, 24~48 hours can be excreted with urine metabolism without harm. In addition, drinking lots of water can help dilute the acidity of urine and prevent kidney stones and failure.	Excessive manganese can cause neurological, liver, and kidney changes that affect the central nervous system in humans. In addition to affecting learning and behavior, it can also cause symptoms similar to Those of Parkinson's disease: shaking hands, impassive facial expression, sluggish movement, and stiffness.	Excessive manganese can cause neurological, liver, and kidney changes that affect the central nervous system in humans. In addition to affecting learning and behavior, it can also cause symptoms similar to Those of Parkinson's disease: shaking hands, impassive facial expression, sluggish movement, and stiffness.	Toxic substances such as lead and cadmium can be introduced if they enter the body Chronic poisoning, severe gum lead line, and gastrointestinal tract Diseases, neurasthenia and muscle pain. In children, it can also affect intellectual development.
Precautions for Use	Because the material will be aging, as long as there are scratches and damage, it cannot be used, so it must be updated.Do not use melon cloth or steel brush cleaning, to avoid damaging the surface, should be soaked with sponge or cloth cleaning, can prolong the service life.	The tableware that contains manganese, fight oxidation degree is insufficient, the proposal does not let strong alkalescent detergent encounter tableware, also avoid to scratch surface with spatula better. Metal chopsticks have better thermal conductivity, so be careful of scalding your mouth when eating hot food.	Material is fragile, very easy to damage, easy to scratch the skin, broken place is easy to hide dirt. Heavy weight and high cost. When washing dishes by hand, avoid using coarse melon cloth or abrasive lotions. When you store your dishes,Do not stack to avoid scratching the surface.	After cleaning must be really dry, semi-wet dry more easily permeate water vapor, adhere to the small white insect food microbacteria, dirty. Avoid soaking in kitchen waste soup for a long time, which will change color easily.Not suitable for hot food, prolonged high temperatures will make the wood shrink, deformation, and even fracture.

Melamine Cleaning & Maintenance

Leftover vegetables placed for a long time will make the color of food easy to stain on the tableware, affecting the use of tableware, so after dinner should be promptly removed from the residual vegetables!

Soak the tableware in warm water with neutral detergent at 30℃~40℃ for 20~30 minutes before subsequent cleaning process. If there is difficult to wash food residue can be soaked in 50℃ water after cleaning.

MACHINE WASH

Place the dishwashing dryer and add neutral detergent to set the water temperature at 60℃ ~70℃ for cleaning.

Keep the temperature between 70 ° C and 85 ° C dry, and set the running time to about 30 minutes. Remember to confirm regularly detergent concentration, water pressure, water, water temperature is suitable for cleaning the United StatesTableware.

Disinfection storage: When the disinfection cabinet is used, it is generally set at 80℃~85℃ for 20~30 minutes. Place the tableware so that there is a certain space between the tableware, so that the tableware can dry quickly on average. The temperature of the hot air outlet of the disinfection cabinet will be relatively high. Please try not to place the tableware in the outlet to avoid damaging the tableware. Please do not shorten the service life of tableware caused by repeated heating and disinfection.

HAND WASH

Clean with napa cloth or sponge. Reduce damage to cutlery when cleaning.

Rinse the cleanser thoroughly to avoid detergent residue. cleanThe incompleteness of agent washing is also one of the reasons for the short service life of the Mei-nai tableware.

Melamine life & Precautions

In fact, there is a fixed number of years of cutlery, even if it is originally high-quality, but after a long time, the material of cutlery is aging. Generally, chopsticks, spoons, forks, cleaning agents and bleach are used to clean the cutlery. It is possible to produce scratches, missing angles and cracks when placing the cutlery.

So how many times does the table ware get used?
How many years will it last? Roughly 1,000 times. If it is used as a nutritious school lunchware, it can be used 180 to 200 times a year for about five to six years. (in the case of dishwashers and storage cabinets), regular replacement is required according to the annual rate of breakage, and please consider the number of years of use in terms of the state of handling, the way the cutlery is cleaned, and the damage caused by stacking of the cutlery.

When using cutlery, be careful

1. Do not microwave or cook food.
2. Less hot and acidic food should be served on cutlery Spoons, spoons and chopsticks should not be cooked in hot soup or wok.
4. The table ware can not be cleaned with melon cloth or steel brush to avoid damaging the surface and leaving scratches. It should be cleaned with sponge or cloth after soaking, which can prolong the service life.
5. As long as the cutlery is scratched or damaged, it cannot be used, or the cutlery should be updated due to the aging of the material after years of use.6. Avoid buying medinware with irritating odor and prevent buying secondary products with formaldehyde residue.7. Buy high-quality, branded meronite tableware, not overly cheap or irritating taste meronite tableware. (May have formaldehyde residue)

Instructions

Precautions for Use

Do not use the fire near the fire.

Do not steam or keep warm.

Do not use in microwave or oven.

Avoid hot oils and chemicals.

Clean up a little

- Choose neutral detergent when cleaning, avoiding erosion by acidic or alkaline detergent.
- After tableware cleaning, disinfection and sterilization, should avoid the use of ultraviolet sterilization.
- Anyway, don't use chlorine bleach.
- Soaking at high temperature for a long time damages the surface, so soak in warm water at 30~40 ° C for about 15~20 minutes. If need to boil disinfection, should shorten to the minimum time (about 1~2 minutes), avoid long time boiling.
